BRAND GUIDELINES

Identity system and page design foundations for a personal finance product built around control, clarity and quiet momentum.

Order your money.
See progress calmly.

PRIMARY SIGNATURE

ORDIN

LOGO SYSTEM

Use the dotted mark to signal precision, rhythm and modular control.

PRIMARY LOCKUP

ORDIN

ICON

WORDMARK

ORDIN

Clear space: at least 0.5x the icon width around the signatu
Minimum digital size: icon 24 px • lockup 140 px wide.

BRAND INTENT

- **Precise**
  Clean structure, disciplined spacing and a strong hierarchy.
- **Calm**
  Dark surfaces stay composed even when data gets dense.
- **Progressive**
  Moss accents highlight action, momentum and insight.

USAGE RULES

DO — Use on dark graphite surfaces for the default lockup.

DO — Use the icon alone for favicons, avatars and app launch screens.

DON'T — Stretch, rotate or overuse glow.

CORE SYSTEM

COLOR PALETTE

MOSS #3F6F5A	**SAGE** #79AA8D	**MIDNIGHT** #0E1212
SURFACE #141A19	**FOG** #EEF1EE	**SLATE** #99A39E

Accent behavior

Moss-green signals activity and positive momentum. Fog carries critical data. Slate supports labels, helper text and secondary UI.

TYPOGRAPHY

Inter Display
Headings and hero numbers

Inter — Regular / Medium / SemiBold

Roboto Mono — Labels, microcopy and data tags

Scale

H1 86 / H2 56 / H3 36 / Body 24 / Label 20 / Data tag 18

Favor tight line length, generous spacing and clear contrast. The wordmark may use a slightly narrowed, angled treatment for a precise, forward-looking tone.

ORDIN

UI PAGE DESIGN SYSTEM

Guidelines for dashboard pages, data surfaces and interaction patterns in the front-end.

PAGE DESIGN NORTH STAR

Dark, stable surfaces.
Muted moss accents.
Large numbers first.
Dense data, never noisy.

LAYOUT

Use a 12-column content grid, 24 px gutters and an 8 pt spacing system. Favor wide cards and clear grouping over nested panels.

SURFACES

Base background stays midnight. Cards use deep graphite surfaces with 1 px borders and quiet shadows. Keep outlines subtle.

BUTTONS

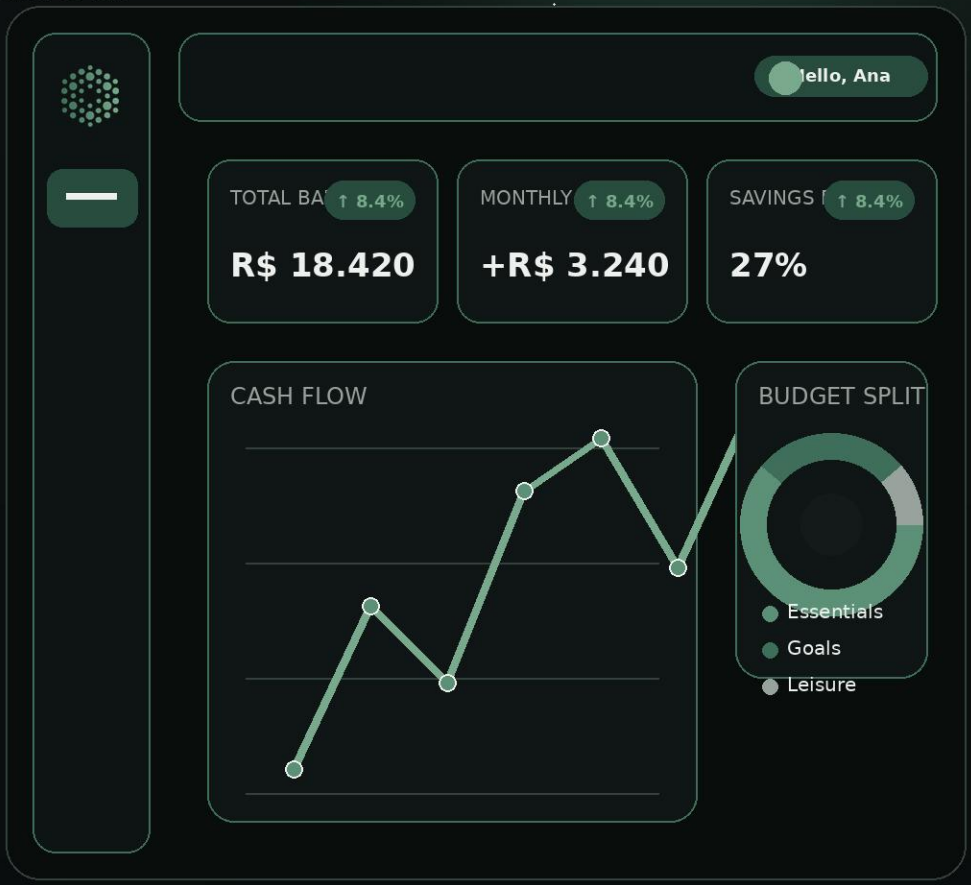
Primary actions use moss fills. Secondary actions stay dark with outlined borders. One stronger CTA per view is enough.

INPUTS

Input height: 48 px minimum. Use slate labels, fog values and a moss focus ring. Align numbers right in data-heavy contexts.

CHARTS

Prefer one restrained green scale per chart. Reserve brighter sage for the active series. Avoid rainbow palettes.



DASHBOARD COMPOSITION

Structure each page with a strong summary row, one hero visual and supporting detail modules. Users should understand status within the first 3 seconds.

COMPONENT RULES

Navigation

- Stable left rail
- Short labels
- Clear active state

Cards & Data

- Number first
- Support with trend badges
- 24 px internal padding

Motion

- Animate emphasis
- Avoid flashy scene changes
- Keep transitions crisp

Primary | Secondary | Alert

72 px sidebar | 24-28 px radius | Recommended 180-220 ms
